

FIREPROOF CURTAIN

HORIZONTAL FIRESHIELD-H

Smokeproof membrane

A low-weight smokeproof membrane to cover large openings to prevent the spread of fire and smoke in case of fire.

The system features a light static load on the supporting structure, approximately, 1 kg per sq m of the opening.

Various fire resistance degrees depending on customer needs:

- 120 (no water spraying);
- EI120 (with water spraying)
- EI180 (with water spraying)

Dimensions

Maximum width:unlimited

Maximum height:unlimited

Leaf

Material:Firetex600

Fabric weight: 435 g/m²

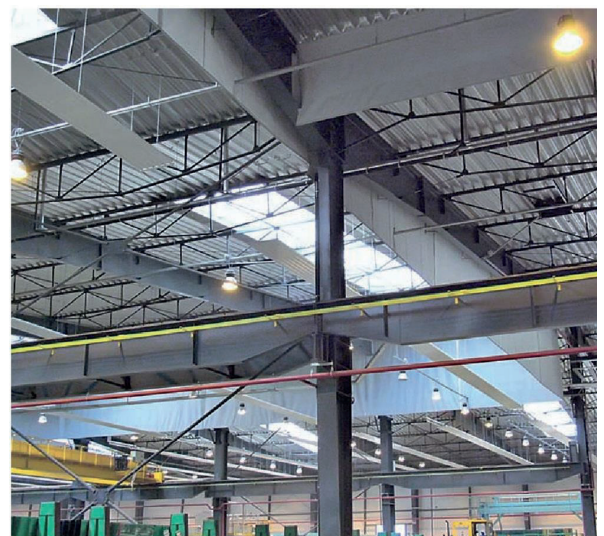

Weight with coating: 455 g/m²

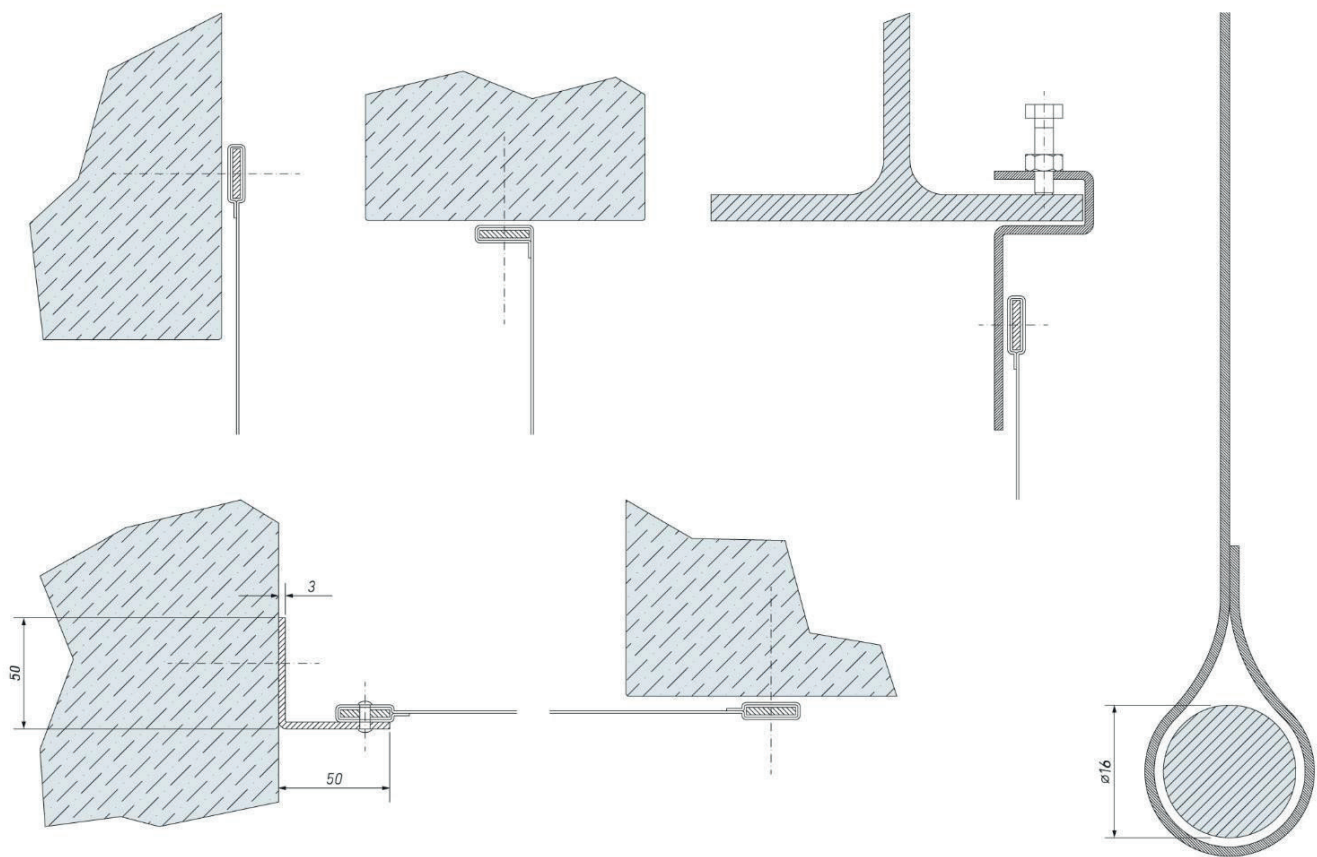

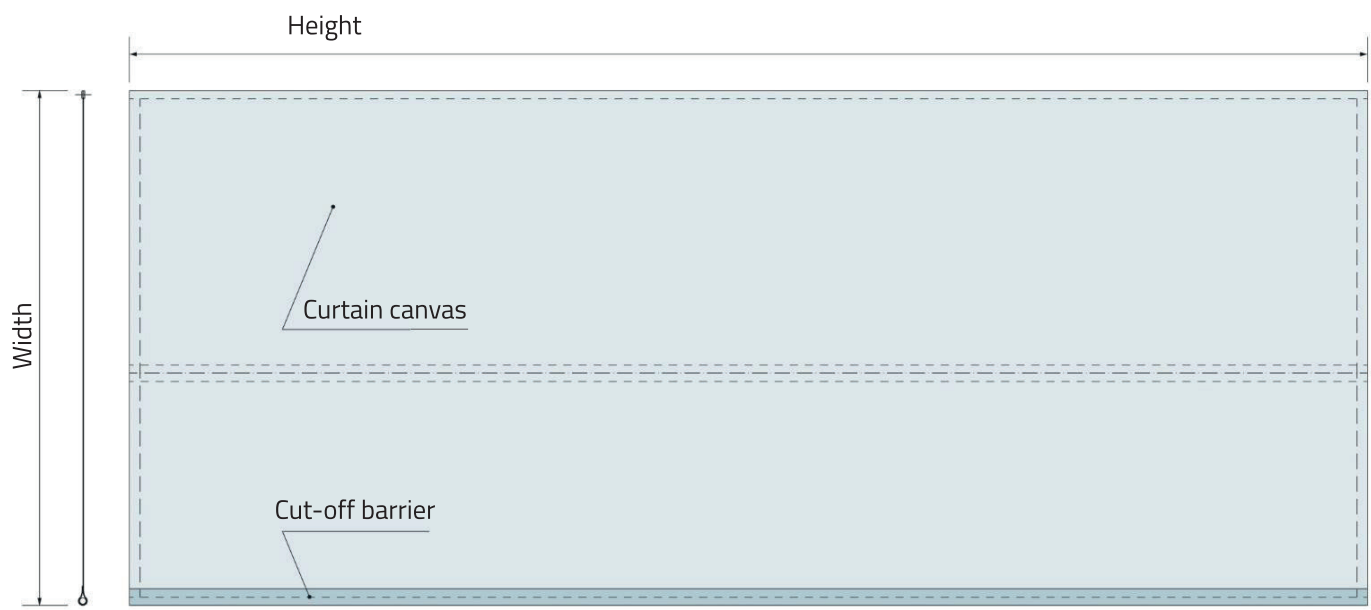

Material thickness: 0,40 mm

The leaf fabric is certified as non- flammable and non-toxic.

Installation
